

## Web Installation Guide

# PREREQUISITES

Before setting up the StreamHash website, you need to download and install the following frameworks in your system to build a conceivable environment.

## **1. XAMPP**

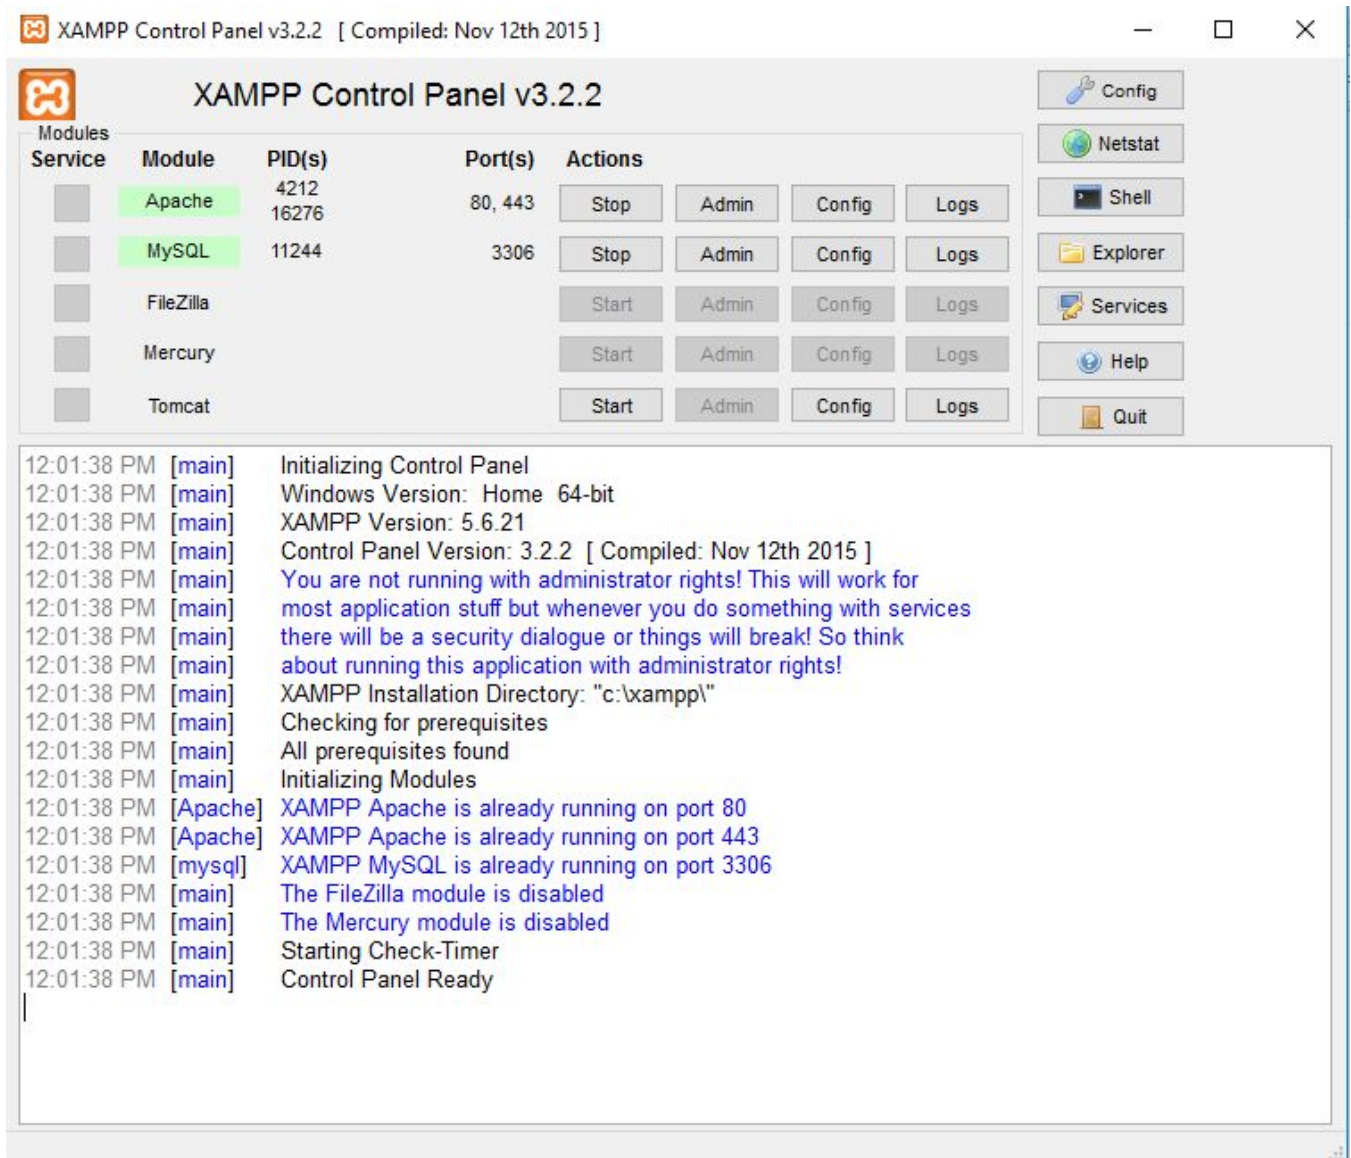

Source to download XAMPP:

<https://www.apachefriends.org/download.html>

# Web Installation

**Step 1.** Download StreamHash - Web Installation package.

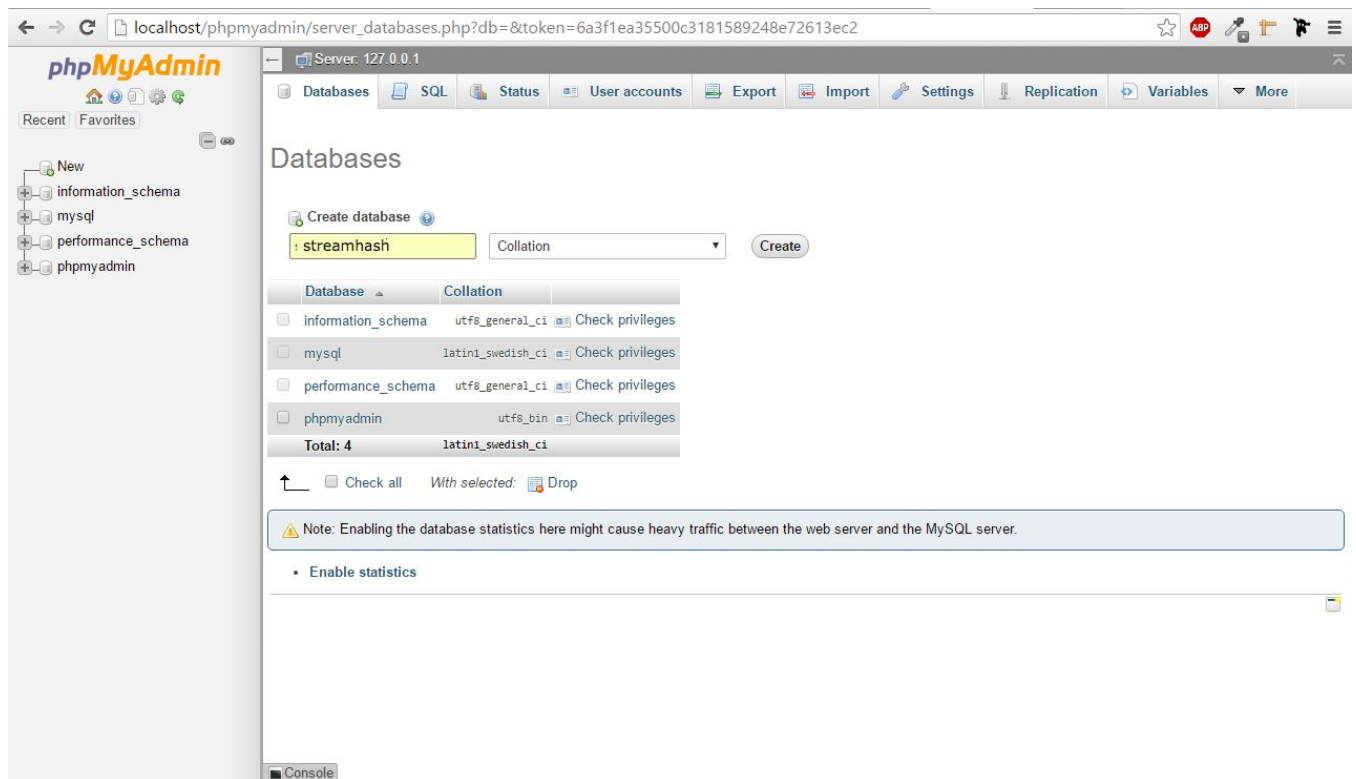

**Step 2.** Launch XAMPP Control Panel in your system and start Apache and MySQL.

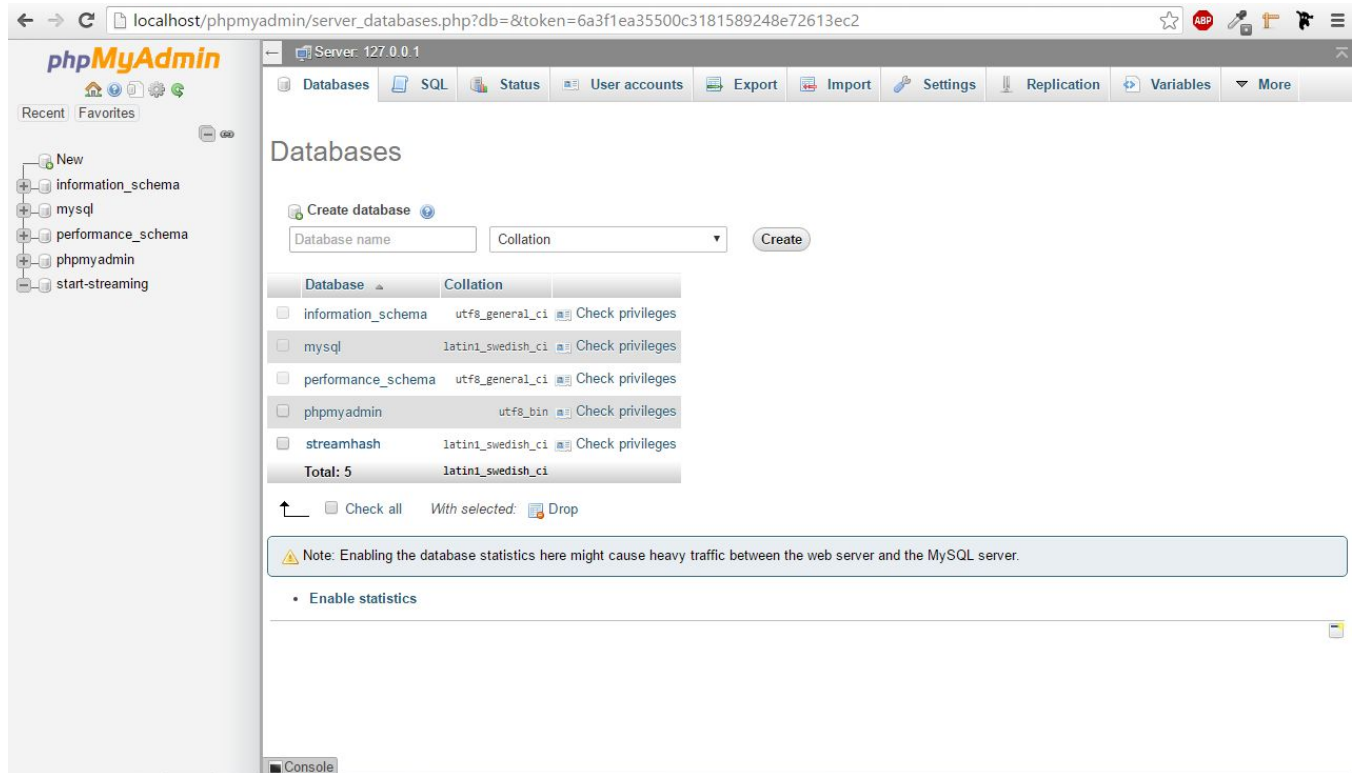

**Step 3.** In your web browser, type the URL: **'localhost/xampp'** to open XAMPP for Windows dashboard.

**Step 4.** Select ‘**phpMyAdmin**’ from the option available in the left panel on the tab.

**Step 5.** Now to create a database, select the database tab and create a new database by providing the ‘**Database Name**’. Then click on ‘**Create**’ to confirm.

**Step 6.** Select the created database from the left side menu and import the SQL file (**common.sql**) from **DB** folder inside the StreamHash package.

**Step 7.** Copy the StreamHash script and paste it inside htdocs folder of XAMPP at **C:/xampp/htdocs/**

**Step 8.** Now edit the .env file in **C:/xampp/htdocs/streamhash**

**DB\_HOST** = localhost (Provide Database host URL here)

**DB\_PORT** = 3306 (Provide Database port here)

**DB\_DATABASE** = streamhash (Provide the Database name from step-5)

**DB\_USERNAME** = root (Database username)

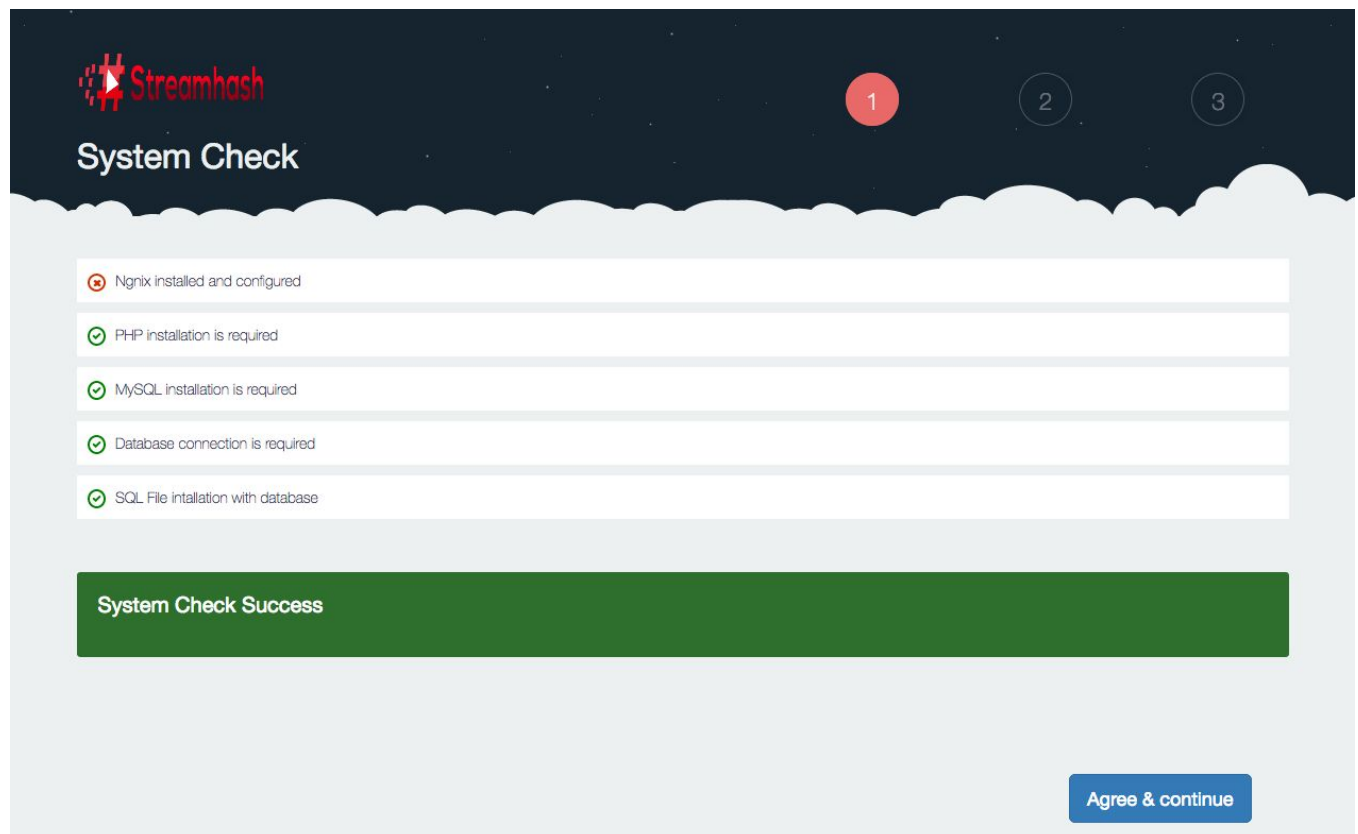

**DB\_PASSWORD** = (Database password)

For JWPlayer integration for StreamHash feature,

**JWPLAYER\_KEY** = your\_jwplayer\_id

**Step 9.** Open a web browser and type the URL **http://localhost/streamhash/**,

⇒ A System Check page will appear where the updates of the system check will be validated and you have to click on '**Agree & continue**'

⇒ The final step is where you add the site name, site logo, favourite icon and the streaming url. Once these data are provided, click on ‘**Submit**’ button. There you have it! It’s all done.

**Streamhash**

## Configure Site Settings

**Note :**

It is very simple, just start adding categories and sub-categories and upload video from admin panel or moderator panel, thats it we are good to go. User can able view all trailer videos without payment. Once the payment is done user can able to view the full movie video. Payment is like subscription model. Payment enable, disable and amount for 30 days are controlled by admin.

Site Settings

**Site Name**

Stream Hash

**Site Logo**

Browse... No file selected.

**Fav Icon**

Browse... No file selected.

**Streaming URL**

Ex: rtmp://streamhash.com/vod2/

Submit

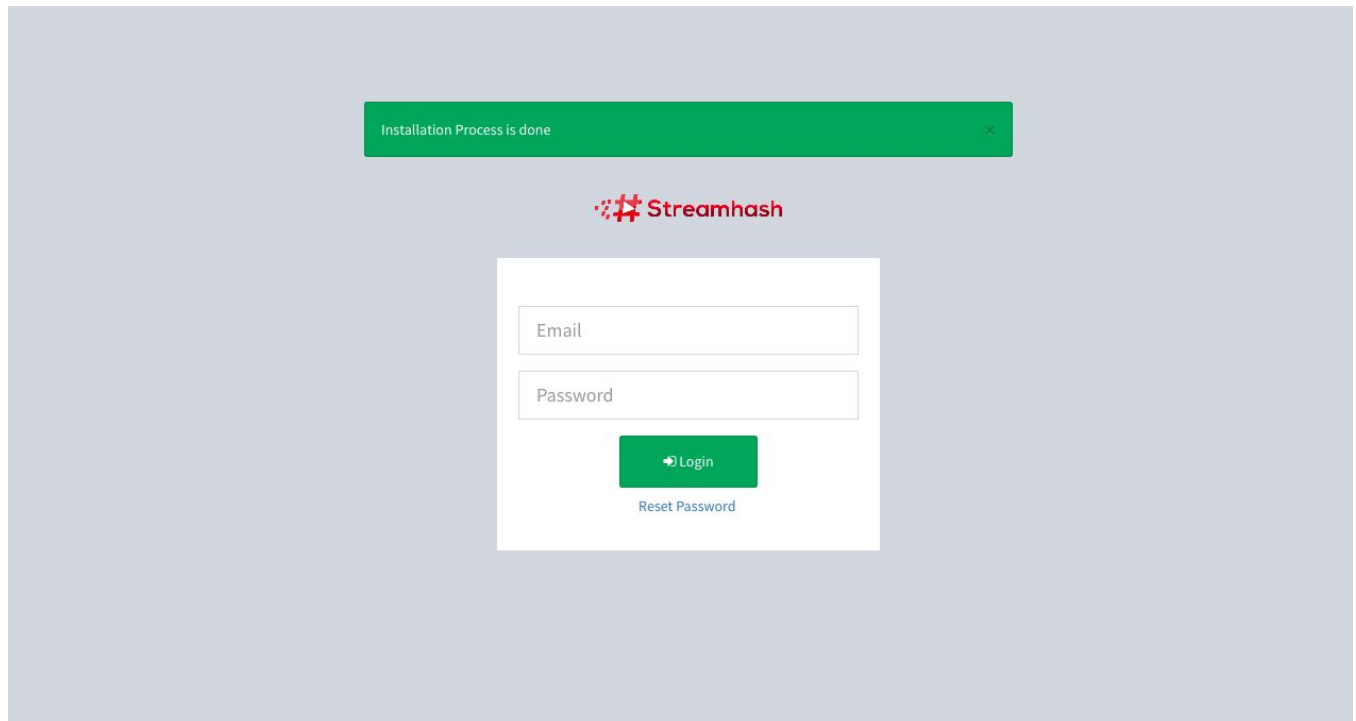

**Congratulations!!!**

**You have successfully set up the website!**

# Admin Login

Now open a browser and type the url: **http://localhost/streamhash/admin/**, enter the admin credentials and click on 'Login'.

The image shows a web browser window displaying the Streamhash Admin Login page. At the top, there is a green notification bar that says "Installation Process is done". Below this, the Streamhash logo is centered. The main content area is a white box containing two input fields: "Email" and "Password". Below the "Password" field is a green "Login" button with a right-pointing arrow icon. Underneath the "Login" button is a link that says "Reset Password".

The Default Admin Credentials are

**Username** : admin@streaming.com

**Password** : 123456

Go ahead and explore the Admin panel.

Note: The mobile push ports to be open and the whole setup needs to be elastically scalable. We recommend using [DigitalOcean.com](https://www.digitalocean.com), who we have been using for the past 4 years for hundreds of successful client projects. Also, here's a \$10 discount code.

## You are all set to build your Social Media now!
